DATA IN IBM CLOUD PLATFORM:

The screenshot shows the IBM Cloud IoT Platform interface. At the top, there are tabs for 'Browse', 'Action', 'Device Types', and 'Interfaces'. A 'Add Device' button is in the top right. Below the tabs, a table lists devices. The first device is '12345' with status 'Connected', device type 'NodeMCU', class ID 'Device', and date added '17 Nov 2022 14:46'. Below the table, the 'Recent Events' tab is selected, showing a table of events. The events table has columns: Event, Value, Format, and Last Received. The events are as follows:

Event	Value	Format	Last Received
status	["latitude":10.756,"longitude":78.6513,"weight":57]	json	a few seconds ago
status	["latitude":10.756,"longitude":78.6513,"weight":57]	json	a few seconds ago
status	["latitude":10.756,"longitude":78.6513,"weight":57]	json	a few seconds ago
status	["latitude":10.756,"longitude":78.6513,"weight":57]	json	a minute ago
status	["latitude":10.756,"longitude":78.6513,"weight":57]	json	a minute ago

At the bottom of the interface, it says '0 Simulations running'.
